Email : britelyassine47@gmail.com

Computer science engineer in Algorithmics and Intelligent Systems program**, with a strong foundation in deep learning, algorithmics, and multi-agent systems. I combine rigorous theoretical training with hands-on experience building, fine-tuning, and deploying LLM-based systems. **I am seeking a research internship to explore the theoretical and empirical foundations of continual learning in deep neural networks.

EDUCATION

MASTER'S DEGREE IN ALGORITHMICS AND INTELLIGENT SYSTEMS — UNIVERSITY OF CAEN — In progress

Advanced training in algorithmics, artificial intelligence, and intelligent systems, with a focus on modeling, analysis, and optimization of complex systems.

ENGINEERING DEGREE IN SOFTWARE ENGINEERING (4-YEAR, BAC+4) — ESCOLA POLITÈCNICA SUPERIOR DE LLEIDA — 2020 - 2025

Specialization in software development, advanced programming, software architecture, interface security, advanced databases, and project management.

- THIRD YEAR ABROAD: POLYTECH ANNECY-CHAMBÉRY, FRANCE (2024)

SPANISH BACCALAUREATE — BAC-2020

PROFESSIONAL EXPERIENCE

ATL Communications - 4mois — Feb 2026 – May 2026 (4 months)

Developed a 5G laboratory interface enabling real-time network control and monitoring, with CLI functionality and access to the state of a 5G Core architecture.

Media Caris — 2025

Developed a clinical AI chatbot combining agent loops with the creation and fine-tuning of a healthcare-specialized LLM, using NLP pipelines, HIPAA compliance, and a RAG system.

Future Networx — Jun 2024 – Aug 2024 (3 months)

Trained on 5G networks and built an alerting interface for data processing, management, and monitoring of a 5G network using Grafana and Prometheus, including security and latency anomaly detection.

TIClabUIR — Jun 2023 – Aug 2023 (3 months)

Built an authentication server and software architecture for a ride-sharing and transport application.

RESEARCH & PROJECTS

- **Sports Event Prediction System (LLM-based)** Designed a system that automatically detects and predicts event timelines from social-media user interactions using large language models.
- **AI-Powered 5G Interface:** Built with AngularJS, integrating an AI assistant for network diagnostics and troubleshooting, with secure, role-restricted user actions. Fine-tuned the model and designed an optimized architecture to ensure performance and network security.

TECHNICAL SKILLS

- **Machine Learning / Deep Learning:** Machine learning, deep learning, neural networks, Transformers, computer vision
- **NLP & LLMs:** Natural language processing, language models (LLMs), fine-tuning, RAG, agent loops
- **Frontend:** Next.js, React, Angular
- **Networking & Cybersecurity:** TLS/HTTPS/AES-256, IAM, RBAC, OAuth2/OIDC
- **Testing:** Unit testing (Jest)
- **Multi-Agent Systems & Algorithmics:** Decision-making algorithms, multi-agent systems
- **Languages & Frameworks:** Python, [PyTorch / JAX / TensorFlow], C, C++, JavaScript/TypeScript, Swift
- **Data Engineering:** Pandas, data engineering, Jupyter Notebook
- **MLOps / DevOps:** TDocker, Kubernetes, Helm, Jenkins, SonarQube, CI/CD, Prometheus, Grafana
- **Backend & Architecture:** Node.js, Express.js, Django, Flask, .NET, MVC, MVP, microservices, REST APIs, multi-tenant
